- Intensive Care/Coronary Care Unit
- Progressive Care Unit
- Family-centered Birthing Center
- Diagnostic Imaging Department
- Inpatient and outpatient laboratory services
- State-of-the-art Cardiac Catheterization Lab
- all digital cardiovascular and interventional imaging system
- The Southwest Virginia Center for Orthopedics
- Surgical services
- Laser and micro laparoscopic technologies
- The Montgomery Regional Heartburn Treatment Center
- Complete rehab services
- Health education center. Emergency Medicine

The 16-bed Emergency Department at Montgomery Regional Hospital has two obstetric and gynecology exam rooms, and ENT exam room, two cardiac care rooms, two trauma rooms, and a three-bed observation area, two suture rooms, a special pediatric exam room, and a cast and splint room. This Emergency Department is a Level III Trauma Center with all of the RNs certified in Advanced Life Saving Courses (ACLS, TNCC, PALS, CEN). The Emergency Department works closely with the regional Emergency Medical Services by providing educational in-service opportunities on a monthly basis. Orthopedic Services

The medical professionals at the Southwest Virginia Center for Orthopedics enlist a comprehensive, leading edge approach to the prevention, assessment, treatment and rehabilitation of musculoskeletal injuries. Our highly trained team of surgeons, nurses, physician assistants, rehabilitation specialists and various medical support personnel works with each patient and their primary care physician to develop a treatment plan specifically for that patient. By combining extensive clinical expertise with a compassionate, caring treatment philosophy, we have created a program known for its quality of care. Cardiology/Cardiac Services

With three cardiologists and a Cardiac Catheterization Laboratory, which provided the first state-of-the-art digital system in the state of Virginia, Montgomery Regional Hospital offers greatly expanded cardiology services, including sophisticated diagnostic procedure such as transesophageal echocardiography and cardiac rehabilitation programs. Birthing Center

The Birthing Center provides eight state-of-the-art LDRP (labor-delivery-recovery-postpartum) suites with the comforts of home. We encourage rooming in for father and baby. In every birthing suite, there is a family dining area, and Room Service menu meal delivery is available for the mother. A Level II nursery is available for normal and high-risk infant care. Central fetal monitoring and secure infant abduction prevention systems are in place. Internationally board certified lactation consultants staff our Lactation Center and visit all new moms and are available post-delivery for follow up consultations.

- Prepared Childbirth Classes - offered in 6-week sessions or over a weekend
- Pre-Natal & Post-Natal Fitness Classes sponsored by the Weight Club & Fitness Center
