

Family Medicine Residency

Michael H. Clary, DO
Program Director & Family Medicine Residency

As part of the Graduate Medical Education training program at Montgomery Regional Hospital, the Residency in Family Medicine offers a unique opportunity to train in strong clinic settings both on the hospital campus and in private practices. As an osteopathic training program, in collaboration with the Edward Via Virginia College of Osteopathic Medicine (VCOM), our faculty maintains a focus on osteopathic medical manipulation.

We place a high priority on our commitments to quality measures and patient safety. We are proud of our new training program launched in July, 2008, and encourage not only excellence in clinical training, but also the growth and development of each physician-in-training as a person. Thank you for your interest in our training program, and I hope to meet you soon.
